Horizon Dental Care Provides Relief for Emergency Patients During Covid-19

March 26, 2020, HAWLEY, PA – Dr. John Evanish, III, President and CEO, Horizon Dental Care, is pleased to announce some relief for patients with dental emergencies. Horizon Dental Care will continue to provide emergency services at their Hawley and Honesdale locations during the Covid-19 crisis. Horizon Dental Care can remain open due to meeting the stringent infection prevention and control [requirements recently mandated by the State of Pennsylvania.](#)

On March 24th, Horizon Dental Care outfitted two treatment rooms, one in their Hawley Office and one in the Honesdale Office, with negative pressure isolation rooms with HEPA filtration and PPE supply (N95 mask or higher, goggles or a face-shield covering face and sides, disposable gowns and gloves) to be fully operational for emergency appointments.

For the safety of all, Horizon Dental Care is asking patients to call their offices before coming in and refer to their [Guidelines for Emergency Appointments](#), located at www.horizondentalcares.com. In some cases, related to pain or infection, the patient can be treated with antibiotics and pain medication. True dental emergencies such as bleeding, facial swelling, abscess, pain, trauma, etc. generally need to be addressed by a dentist in the dental office.

For patients seeking emergency dental care, they may contact Horizon Dental Care in Hawley at 570.226.8800 or Horizon Dental Care of Honesdale at 570.253.4245 or for more information visit www.horizondentalcares.com.
